## BEGIN TRANSCRIPT

**Dede Laugesen:** [00:00:15] Hello, everyone. Thanks for joining us today. I'm Dede Laugesen, executive director for Save the Persecuted Christians. Thanks for joining us today. This webinar is part of our ongoing webinar series, generally on the third Thursday [00:00:30] of each month focused on extreme discrimination, harassment and violence experienced by a record 360 million followers of Christ worldwide and other threats to religious freedom, prosperity and peace for people of all beliefs. A video of this webinar will be posted to SavethePersecutedChristians.org. Within a day or two of the end of our program. Videos of our other webinars are there too. Please share these links with [00:01:00] your elected officials, friends, colleagues, and other networks. Our moderator today is Frank Gaffney. Frank is the president and CEO of Save the Persecuted Christians, Vice-Chair for the Committee on the Present Danger, China, and co-sponsor for the Sovereignty Coalition.

**Frank Gaffney:** [00:01:16] Thank you, Dede, and a welcome to all of you to a very special, very timely webinar program sponsored by Save the Persecuted Christians. But drawing on [00:01:30] a wealth of knowledge and insights and yes, webinars that have been produced under other banners by many on this team as well, including a webinar conducted just yesterday by the combined efforts of the Committee on the Present Danger China and its Stop Vaccine Passports Task Force. We're going to cover some of the same ground, but I believe we're going to come at it from a different [00:02:00] perspective. We're going to be talking in this program about the threat to humankind. Now emerging from the surrender of the sovereignty of the United States of America to a Marxist. Chosen for the job from obscurity and Ethiopia by the Chinese Communist Party to be the director [00:02:30] general of the World Health Organization. A man who

stands accused, I think properly, of terrorism in his previous incarnation in Ethiopia of arguably genocide as a result of his role in the pandemic. The Covid 19 pandemic, he began to lie to us about the nature of [00:03:00] the virus, its origins, its transmissibility. And then he lied to us about what needs to be done about it. And the consequence was in a merely advisory role. He helped impose upon the United States of America and indeed nations around the world, what came to be called the China model. A program of. Malfasant [00:03:30] mistreatment of.

**Frank Gaffney:** [00:03:34] A fairly benign. Pandemic. That may not sound like the right pairing of words, but compared to ones that kill. You know, 60, 70, 80%. This was a disease that was relatively benign, and we were nonetheless told that the response to it had to be. Mask mandates, [00:04:00] social distancing, quarantines, lockdowns, mandatory vaccinations with, it turns out, inadequately tested and actually unsafe gene therapies. Falsely described as vaccines. That China model. Ladies and gentlemen. Murdered. By some estimates, 80% of the 1.2 million Americans that have perished to this point, and [00:04:30] countless others around the world. That China model was just the opening act for what is afoot now. As we speak, the House of Representatives is poised to. A firm. Though it will never be said that's what they're doing, but nonetheless affirm the China model. Affirm the idea that Tedros Ghebreyesus should be [00:05:00] not only an adviser to us on. So-called public health emergencies of international concern. He should be the arbiter of when they occur and what must be done in response to them. This is malfeasance. Yes. Involved in entrusting anything to a man with Tedros Ghebreyesus. Track record. It is malfeasance on the part of [00:05:30] members of the United States Congress that they are in any way enabling the transfer of such authority. Not that simply to be an advisor, but to be the arbiter, to be the dictator of what is. The proper response to public health policy challenges, crises, disasters. And by the way, they need not have anything to do with pandemics.

**Frank Gaffney:** [00:06:00] The [00:06:00] kind of power that is about to be entrusted to Tedros Ghebreyesus by the World Health Assembly, with the strong support of the United States government, as well as that of the Chinese Communist Party, as well as that of the World Economic Forum, as well as the World Health Organization, of course, but the United Nations more generally. The European Union. Bill gates, a principal sponsor of the World Health Organization and Big [00:06:30] Pharma, all of whom are now poised to impose upon us. Not one, but two agreements. Treaties. That will strip

the United States of America and other nations around the world. Of sovereignty. In our case, states rights. And the medical freedom of the American people. And [00:07:00] it will do so. With only one hearing. As things stand now. One hearing in the United States Congress. And that clearing entailed taking testimony exclusively from three administration witnesses. All of whom lied under oath. Assuring. The committee members and the Congress that there would be no infringement [00:07:30] upon our sovereignty arising from these treaties. You'll be hearing more about all of this from the distinguished panel that has been assembled for the purposes of talking about this, but I simply want to impress upon you. This is arguably the greatest surrender of sovereignty voluntarily by any nation in the world, let alone all of them in the history of the world. It is unconscionable.

**Frank Gaffney:** [00:07:58] It is a travesty. [00:08:00] And when the American people find out what is afoot, they will have none of it. The question before us is simply this will that take place before the deed is done? At the end of May, 66 days from today. Or will it take place? After. The Biden administration has [00:08:30] formally committed this country. To such a surrender of sovereignty. And the rest. Our purpose in holding this webinar is to make the case that not only should that not happen at all, but it certainly should not happen before the American people are advised of what is going on here. Given an opportunity to assent to having their sovereignty, their medical freedoms, stripped [00:09:00] from them. And not least, to have the Senate of the United States formally reject these treaties, and the government of the United States formally withdraw from the World Health Organization so as to ensure that we are not subject to the tyranny that Tedros Ghebreyesus and his friends have in mind for all of us. So. [00:09:30] I appreciate the chance. To speak frankly. I hope that in doing so, we've set the stage for a conversation that will be both memorable and impactful on this very day. Where the Congress of the United States is being told it must. Adopt. A bill tomorrow that will fully fund [00:10:00] the World Health Organization and remove language from the House version of the Foreign Operations appropriations bill that would have a.

**Frank Gaffney:** [00:10:13] Defunded the World Health Organization and be ensured that before it was funded again. The Senate of the United States would in fact have the opportunity to advise and consent. Per its constitutional responsibility, to two treaties that would fundamentally [00:10:30] transform our country. And, I believe, destroy the constitutional Republic we cherish. This will have impact on Christians, of course. Here

and elsewhere around the world who turned to this country? For its protection. For its leadership. For its example of freedom. And we hope that each and every one of you listening to this program, either live or in the future, will [00:11:00] become part of the effort to assure that this fate does not befall us. We're going to hear next from one of our principal leaders in so many of the efforts this team makes. Her name is Reggie Littlejohn. She is the founder and president of a marvelous organization, Women's Rights Without Frontiers. And in her spare time, she is a member [00:11:30] of our Committee on the Present Danger China. She is the co-founder of this committee's Stop Vaccine Passports Task Force, the Sovereignty Coalition, and now the founder of the Global Anti-Globalist. Excuse me, the Anti-globalist alliance. She's a Yale trained attorney, and she brings tremendous intellect and religious conviction to [00:12:00] the task we have today, which is to stop the surrender of our sovereignty, and, I believe, humanity to the World Health Organization. Reggie Littlejohn, welcome. The floor is yours.

**Reggie Littlejohn:** [00:12:15] Thank you, Frank, for that passionate introductory statement. Well said. All right. So we are facing existential threat to our national sovereignty and our personal medical freedom. And it's time for all [00:12:30] of us to draw a line in the sand and say, we will go so far and no further. So in my opinion, the World Health Organization is the weaponized arm of the Chinese Communist Party. The UN and the WEF and the entire globalist cabal. They seek to control the world through the one Health approach. And just so you know, there was a new draft that came out March 7th of the new pandemic [00:13:00] treaty. And it retains the paragraph, the article about one health. So what is One health? Well, first of all, one health is very ill defined. There is no definition that is like the definitive definition. But what the general concept is that human health is connected to animal health, is connected to plant health, is connected to the environment. And I don't dispute that there's a connection between all of those, but [00:13:30] the problem is that it can be used for nefarious purposes. And so what the World Health Organization is doing is it's using this seemingly benign one health approach to try to take over every aspect of life on Earth. So basically, what they're saying is that because of one health they will have under their purview agricultural production and land use. So you think of the Dutch farmers and the nitrogen emissions, climate [00:14:00] change and the impacts of climate on animals, ecosystems and humans.

**Reggie Littlejohn:** [00:14:03] So what that means is that they can exert control over us because they say that the climate is changing economics and complex systems and civil society. Global trade. These are all the different things. If you can look at all these different little dots around it, and this is what they are asserting that they will have control over through one health. And there's other analyses of it, one of which says that [00:14:30] they will have control over global trade, commerce and security, public policy and regulation, the welfare and well-being of animals, humans, ecosystems and the planet. So through One Health, the World Health Organization is claiming that the well-being of animals, ecosystems and the planet are all under their jurisdiction. And what that means is that Tedros Ghebreyesus is going to be calling the shots on basically every aspect of life on Earth. [00:15:00] How are they going to achieve this? They're going to achieve this through surveillance and censorship. So in the new pandemic treaty, and not only the treaty, but also in the amendments to the International Health Regulations, they each of them is so important. It's in both documents. They've got surveillance and censorship. They want to be able to surveil every aspect of humans, plants, animals and ecosystem. And that [00:15:30] if any one of us like, for example, the people on this webinar, disagrees with their interpretation, then they will countries are agreeing to combat misinformation or disinformation and even to prevent it. So we're talking about severe censorship.

**Reggie Littlejohn:** [00:15:45] It's not just a matter of engaging so-called misinformation or disinformation, which is basically anything that the World Health Organization disagrees with, but preventing it from getting out in the first place. So we're talking about severe censorship and control. And [00:16:00] then how are they going to enforce that? The digital ID is the enforcement mechanism of one health and the surveillance. You will be required to have a digital ID in order to do everything that's on this chart. In other words, you'll be required to have a digital ID to access health care. So you go you're going to have to access who approved health care. You're going to have to have a digital ID, financial services. You'll have to have one to open a bank account or to carry out online transactions. [00:16:30] You'll have to have one to travel for humanitarian response if there's a catastrophe in your area, if you have, you know, a tsunami or whatever, you are going to have to have a digital ID in order to get humanitarian aid, you'll have to have a digital ID to conduct business transactions and to shop online, to use social platforms to vote and to pay your taxes, collect benefits like Medicare and Medicaid, whatever. Then also for telecommunications, for you to have a device like a

computer [00:17:00] or a cell phone. And then there's the issue of smart cities, which is which is I'll talk about later. Hopefully I'll have time to talk about that. But that's also a way for them to control us so that that is the mechanism of control.

**Reggie Littlejohn:** [00:17:15] Is that it, that they can force you to be surveilled, they can force the censorship by controlling you through this digital identity, because they will have control over whether you are allowed to do any of these things, like access your money or vote or pay your taxes. [00:17:30] So that's the enforcement mechanism. Now. And so these used to be called these digital IDs used to be called vaccine passports. They've been but they call them now like smart health cards or just digital IDs. And they are being rolled out worldwide in with the World Health Organization in collaboration with the European Union. Now, um. One health [00:18:00] makes an equation. In other words, in the most recent draft of the pandemic treaty, it calls for a balancing of the needs of humans, animals, plants and the environment. So the whole idea of that is that. Humans are not the primary concern. Our interests have to be balanced against, you know, the interests of, you know, a cockroach or a rat or whatever else. And to me, this is actually an attack on Judeo-Christian [00:18:30] values, because we believe that God uniquely made human beings in his image and his likeness, and that we have an eternal soul that will, you know, spend, hopefully spend eternity with God in heaven and that these are not necessarily things that are shared with cockroaches and rats. So anyone who makes a, it's a way of lowering the value of [00:19:00] human rights, of human life that just has to be balanced against the animals and plants. So there's there was a. There's a very prestigious medical journal called The Lancet, and they ran an article in January of 2023 called One Health A call for Ecological Equity. And here's a quote. The consequences of this thinking entail a subtle but quite revolutionary shift [00:19:30] of perspective. All life is equal and of equal concern. So. All life. That means that you, your parents, your kids, those you all hold dear, your life is a is equal and of equal concern to that of, for example, an amoeba. So, I believe that this one health approach is going to be used to, number one, surveil us, to surveil every aspect [00:20:00] of life on earth. And number two, to get people out of the rural areas in the wilderness, because what they what they're looking at is what is the interface between animals and humans that give rise to pandemics. So, that's called like zoonotic origin of a pathogen. And there's actually something called bat one Health. You could look it up online. Bat one health, just put it in quotes. And there are places all over, you know, labs [00:20:30] all over the world that are analyzing where people and

bats come into contact with each other. And, and I believe that what they want to do is move us out of the wilderness, will move us out of the rural areas, move us into cities, move us into 15 minute cities where you can only go a 15 minute walk from where you live and enforce that against through the digital IDs and also central bank digital currencies which can be turned off.

**Reggie Littlejohn:** [00:20:55] If you get out of your zone, you will not be able to, you know, buy anything. [00:21:00] And that's a way of completely controlling us. It's, it's a, it's a tool of complete totalitarian control. So, we need to fight against this. And so one of the things that you can do is go on to the Sovereignty Coalition, Sovereigntycoalition.org, sign the campaign to try to get Congress to keep the language that we won, basically from the House of Representatives saying that will be defunded [00:21:30] and any treaty has to go through the Senate because that language is at risk. I understand, actually did not survive the this this most recent negotiation in the appropriations process. But it's not over till it's over. Um. And then also sign the sovereignty Coalition declaration. And by the way, I do want to emphasize one thing. If you are thinking, oh, this sounds impossible, this is never going to happen, and besides, it would have to go through our Senate, please understand [00:22:00] many agreements, for example, the Paris climate accord, the president just signed by executive order, and they are not calling the pandemic treaty and the International Health Regulations treaties. They're calling them agreements, accords, conventions, anything but a treaty because they don't want it to have to go through the US treaty process. And the Senate itself voted down that, that they would have that they would have to vote on this, the any W.H.O.

**Reggie Littlejohn:** [00:22:25] treaty. So don't sit there and think, oh, I'm going to be protected by [00:22:30] the Constitution. The Constitution is a treasure that was given to us by our founding fathers and mothers. And but it can't defend us. We have to use it to defend ourselves. It's just like having a sword and just leaving it there on, you know, on a shelf and saying, oh, I don't have to worry about anything. My sword will defend me. Well, no it won't. You have to use it for it to defend you. And we have to use the Constitution to defend us. So don't think that this is just going to happen automatically. So I'll close now. And just saying that, as [00:23:00] Frank mentioned, I founded the Anti-globalist Alliance, which is going to be an international organization doing similar work. And our saint is Saint Joan of Arc. I believe that Saint Joan of Arc is a woman of

deep faith who is also a brilliant military leader, and who kept her eyes on heaven as she waged battle on earth. If God is for us, who can be against us? And just as God commissioned Joshua to take over the Promised Land, I believe God commissions you and me with these words. [00:23:30] Have I not commanded you? Be strong and courageous. Do not be afraid. Do not be discouraged, for the Lord your God will be with you wherever you are. Thank you, thank you.

**Frank Gaffney:** [00:23:42] Reggie, let me just make one further point, if I may, about the point you've made, Reggie. And that is that the equating? Of man. Women, obviously. And. Bugs or other animals [00:24:00] or plants has one other. Bassett, and that is, it denies the existence of the soul. It is just another example of the, well, atheistic agenda of the Marxist left. Notably the Chinese Communist Party, but others as well. Foreign and domestic. It should be shunned for that [00:24:30] reason alone. And we are on notice that it is part of this, I think, a formula for tyrannical oppression. We're going to turn next to a medical practitioner who has been on the front lines of the fight arising from the misconduct, the malfeasance of the World Health Organization during the Covid pandemic. [00:25:00] Her name is Doctor Carla Dean graves. She is a specialist in osteopathic medicine. She's been practicing for some 49 years. She is based in Kansas City, Missouri, but she has had a nationwide, if not global reach in her resistance to some of the. Prescriptions that Doctor Tedros has handed down and. The advice [00:25:30] that was made compulsory. By many in our country medical practitioners, pharmacists, medical associations, universities, uh governments at every level to varying degrees. We wanted to get her take. In the context of this question of the inhumanity of what is afoot here from [00:26:00] the perspective of someone whose personal experience with the doctor patient relationship has informed everything that she has been doing for the past four years, and why she is so convinced that we must stop what is now going down in surrendering our sovereignty and medical freedoms to the World Health Organization. Doctor graves, thank you for joining us. The floor is yours.

**Karladine Graves:** [00:26:26] Thank you. I appreciate this time. I appreciate the time that [00:26:30] each of you have taken to be with us, and I hope that you take this information and that you multiply it to the spheres of your influence and ask them to do likewise, because it's important that we actually spread the news. And this is news to many, even though some of you probably already know some of this. But the depth of it

is staggering. As [00:27:00] a physician, in late 2019, I received a call saying that there was an ophthalmologist in China who was seeing patients die and unexpectedly, and he was not able to actually help them. From that, he said that he was concerned that something had been released from Wuhan. And as Frank Gaffney has let us [00:27:30] know, Tedros lied about that. And said that there wasn't such a leak. Yet we have found otherwise, haven't we? And if they would lie about such a thing as this, why would they not continue? To lie about the upcoming events that we have. Just so, well laid out for you by Frank and Reggie. To whom much is given, much is required. [00:28:00] This country has been given much. Not because we're necessarily deserving of it, but because we had a foundation that was based on God. That's why it was providential. It wasn't because we were so great and wonderful that we deserve it.

**Karladine Graves:** [00:28:24] We don't deserve anything. Other than what our maker has given [00:28:30] us. As a physician during the pandemic. We understood and knew we started a team immediately to do some research. Because it appeared that this was probably a virus that had been bio engineered and weaponized. So we dove in and we came up with. The first drug that we came [00:29:00] up with hydroxychloroquine. We put a team of researchers together, we prepared a paper. And through the guidance of one of our researchers. Who actually knows very well, President Trump's brother. His late brother, unfortunately. And he delivered that paper on hydroxychloroquine to President [00:29:30] Trump. He reviewed that paper in the very next day. That's when he announced that hydroxychloroquine could be a game changer. For those of you who may have been watching or heard later. Doctor, Anthony Fauci couldn't wait to get to the microphone and discredit. President Trump. And the media immediately. Came on board and said that he was selling [00:30:00] bleach. Ladies and gentlemen. What happened from there? Continued on because as a physician, I had prescriptions that were not able to be filled. I had pharmacists who could would not fill the prescriptions that I was writing that I knew would help. Multiple individuals. There were many of us on the front line [00:30:30] doctors who were writing such prescriptions, and we were denied.

**Karladine Graves:** [00:30:36] We were denied giving what we had been trained for, and that was to save lives. Not allow them to. Be done away with. This was because the World Health Organization at that time was advising. Not to use [00:31:00] medications such as hydroxychloroquine and ivermectin, which have been proven over and over and

over again to be very safe. Ineffective. Have we heard that word safe and effective before? Yes. But has it been? No. The hydroxychloroquine and ivermectin have been shown to be. Even during pregnancy, even with children. [00:31:30] Ladies and gentlemen, this is not just a war on humanity. And I want you to really listen to this. It's important. This is a war on God. God himself. Because all of humanity was made in. The image of God. Not a horse. Not a cow. [00:32:00] Not a chicken. Not a worm. Not a bug. And he imparted into us. And I call it the first CPR because he was the one in Genesis who breathed breath. Life. Into Adam. And it was his life. That he put into humanity. Not. Some. [00:32:30] Magical formula. He put a soul into us, as Reggie said. Ladies and gentlemen, the church has to wake up in America. It's been asleep far too long. It is not standing its ground. In Ephesians it says that we must stand, and we must do all that we can to stand each and every one of you myself.

**Karladine Graves:** [00:32:57] All of us. Who claim [00:33:00] to have Jesus Christ as our Lord and Savior. We have been called to stand. To stand for righteousness. To stand for our faith. To stand for humanity. Not because humans again. Not because we deserve it. But because we have the imprint of God and if they can do away with God. Then they feel that [00:33:30] they have all of humanity. Within their grasp. And indeed they might. If you don't think that Christians are being persecuted in America. Then just last week, I had an 89 year old woman. Who, standing up for life at an abortion clinic, was called a conspiracist, and she's been [00:34:00] charged with ten years. In prison at 89 years of age. This is the type of persecution that we are going to see. Rapidly happen if we allow the World Health Organization to come in and deem anything that they so wish at any time, at any region. A pandemic or a health issue, and that will be through climate. That will be [00:34:30] through endangering a field of grass. It doesn't matter. It will all be the same. It won't your life, nor mine. Will actually be a value. And being a physician and trained. Intently. That life. There is nothing more precious than life and [00:35:00] preserving it. And then to be denied through just recommendations.

**Karladine Graves:** [00:35:07] The ability to save. Thousands of people across this nation. Ladies and gentlemen, just think about this. Any physician who would write anything off of the World Health Organization protocol if this goes through. They will immediately have their license taken away. [00:35:30] Impossibly have high fines or even jail time. We wouldn't be allowed to do anything. Use any medicine off label. Other than what the World Health Organization has deemed, they have set the protocol and

not only what the protocol is, but most likely who would be able to receive medical care. So we must [00:36:00] think about this. Remember, just like the LGBTQ agenda. The gender. If you can do away with gender, you can just about do away with Genesis. Because he made them male and female. Ladies and gentlemen. Let's think about this. Let's talk in our churches. Let's talk with our pastors and our priests. And say, do we really want to do away? With [00:36:30] a value of all of our humanity and their lives and their souls. Or do we just want to become part of a group that is actually. On the side of Satan. And taking God. From our world. It will be a dark world indeed. Should that happen? Thank you so much for inviting [00:37:00] me. I appreciate your time. Take this information. Pray on it. Think about it. But you must pass it on to others. Thank you.

**Frank Gaffney:** [00:37:17] Thank you, Doctor Graves. I think you've powerfully made the case that what we are dealing with is satanic. That score and it should be understood as such. We're [00:37:30] going to develop this thought a little bit further with our next speaker. Her name is Faith McDonnell. She is the director of advocacy at Cosmos Global. She is a DC fellow for the American Association of Evangelicals. She, among other things, is a columnist and blogger. But what I prized most about Faith McDonnell is she is a woman of profound faith and conviction and a freedom fighter, and has been throughout her [00:38:00] extraordinary career. We're privileged to have her as a member of our Committee on the Present Danger China, and, of course, as one of the saved the persecuted Christian team's founders. And we've asked her to speak to the issue of the anti-human beliefs of these global elites that are trying to foist upon us sovereignty. Only to the extent that it is. Permissible under the leadership or the [00:38:30] mastery, if you will, of our new, unelected, unaccountable. And totalitarian. Leader Tedros Ghebreyesus. Thank you, Faith, for joining us, and in particular for talking about profound concern that was raised in our program yesterday by Doctor Meryl Nass, namely, an agenda of de-population of these global elites seem to have in mind and may have figured out a way to try to perpetrate [00:39:00] through the Who. Over to you.

**Faith McDonnell:** [00:39:04] Thank you so much, Frank, and thanks to Dede and Oleg and to all of the panelists here. I'm glad to be here. As you said, my topic is the global elites anti-human beliefs and their ultimate plan to save the planet through De-population. So who are the global elites? No pun intended. Why are they in control? And how should we [00:39:30] act as Christians and people who truly care about

humanity and the sanctity of human life? Who are the global elites? Well, we know the names of some of them names like Gates, Schwab, Harari, Soros, and of course, Tedros Ghebreyesus. But who are they? To understand them, I'm going to use two ideas from a deeply moral Catholic novelist, Flannery O'Connor. O'Connor's [00:40:00] short story A Good Man Is Hard to Find, is about a serial killer named The Misfit. He doesn't believe in God or heaven or hell, so therefore anything goes his philosophy, then there's nothing for you to do but enjoy the few minutes you got left the best way you can by killing somebody, or burning down his house, or doing some other meanness to him. No pleasure [00:40:30] but meanness. The second idea. O'Connor also said tenderness or kindness leads to the gas chamber. She means that people who seem totally opposite of the misfit clean, sophisticated, intelligent, quiet, wealthy elites that are earnest and well-meaning make rules for the good of everyone else. Where the gas chamber part comes in is that they have [00:41:00] control, and anyone who doesn't follow the rules is seen as a threat to everyone and must be dealt with.

**Faith McDonnell:** [00:41:08] So who are the global elites in their anti-human beliefs and their plan to save the planet most? Like the misfit or the tender hearted rulers? We're supposed to believe they are tender hearted rulers minus the gas chamber part. But think about this. Our webinar description said one health is not a benign approach to [00:41:30] health care. It is a dangerous global elite ideology that many believe will ultimately be used to justify the planet's de-population. It is an unprecedented anti-Christian attempt to equate human life with that of bugs, animals, plants and the environment. So here are some of the contradictions that reveal who the global elites of the World Health Organization and the World Economic Forum are under their [00:42:00] tender hearted masks. They claim to promote the health of animals, and yet they want to slaughter millions and millions of farm animals that they claim hurt the environment. In addition, Bill Gates intends to completely re-engineer the global food supply to artificial nonagricultural methods of production, which do not require vast amounts of land under the pretext of saving the planet. But you [00:42:30] can be assured that the global elites themselves will not suffer this artificial nonagricultural food supply. One journalist said. The best description I've ever heard of what these Luciferians are doing is that it's a master slave diet. Plan the peasants farm until the soil in hard labor, only to be allowed to eat gruel, bread and vegetables as the pigs steer and [00:43:00] other meat animals went to the nobility, this formula has been turned into

an attack on humanity. They are inverting the human diet from real food to artificial food in glee.

**Faith McDonnell:** [00:43:13] Reminds me of the misfit, and deeper still into their motivation comes from Dutch political commentator Eva von Hardenbroek. In an interview with Tucker Carlson, she said the push for insect eating is just a compliance test [00:43:30] because our politicians know that when they control the food, they control the people, she said. The Netherlands is the pilot country for this agenda. What about people? What about the tender hearted global elites? Consideration of people, the claim to want to fight climate change and environmental disasters for the sake of people? Well, actually they say the Earth or the planet, but most sane people have assumed that they meant humanity. [00:44:00] But when we look at the toxic effect of solar panels. The human rights violations of children being used to mine lithium, and even the disastrous effects on birds and animals who they claim to love from wind turbines. We can see how much the global elites really care about animals and people. We've already talked about the fact that people not elites, of course, but the great unwashed population of the rest of us are the [00:44:30] problem. Are the pandemic too many of these insignificance, as Yuval Harari would call them, the concept of overpopulation and the need to reduce it by the tender hearted elites for the good of the planet, has been around for a long time. It's part of eugenics and really gained steam in the 1960s. Most of the population slated for reduction was not paying attention, though they weren't invited to the meetings and social clubs [00:45:00] of the elites.

**Faith McDonnell:** [00:45:01] Now, however, the people of the world are waking up and resisting. The globalists, farmers and truckers, God bless them, have provided the most courageous and powerful resistance so far. German Member of the European Parliament Christine Anderson said recently that the EU is in panic mode as millions awaken to the climate scam. They're frightened at this point. People no longer believe in man-made climate [00:45:30] change, and I think they're catching on to the fact that it's a gigantic lie. That's the end of her quote. They are also waking up to the realization that these tender hearted global elites, with one health and global sovereignty, do not have their best interests in mind. Christians and others who believe in the sanctity of every human life, and the divine instructions of God to Adam and Eve to take care of the planet, to steward the earth for him [00:46:00] and take care of the animals. And I guess even the insects should be at the forefront of fighting against this surrender of

sovereignty and the march to death that the tender hearted global elites have planned for them. We should be speaking out boldly and working together, along with the farmers, truckers and others who have seen the light. Because you see, the tender hearted sophisticates and the misfit are one in the same. They [00:46:30] see the rest of us as insignificant on a par with an insect. And although they tout one health as caring for insects, they intend to swat us or step on us like the bugs they think we are. Thank you.

**Frank Gaffney:** [00:46:45] Faith, thank you very much. We appreciate your insights, in particular into this agenda of these self-appointed so-called elites, as well as your shout outs to those amongst [00:47:00] us who have taken them on, notably, farmers and truckers. And the stakes in this struggle could not be higher. So thank you, especially when it comes to the issue of eugenics and de-population. We're going to hear next from Connie Elliott. Connie is another of our partners in so many of these enterprises, notably, a member of our Committee on the Present Danger China, the [00:47:30] Save the Persecuted Christians efforts are sovereignty coalition, and war. She knows a lot about totalitarianism. In fact, she is a subject matter expert on it. She is also very knowledgeable about and thoughtful concerning. Technologies and how they are evolving and being exploited, among other things, for the purpose of controlling populations [00:48:00] and manipulating them to comply with what those elites, or masters, or whomever is running things, say must be done. We're very pleased to have her with us to talk about how this all works, as well as to acquaint us with some of the possibilities for preventing it from working to our great detriment. Connie Elliott, thank you for joining us. Welcome. The floor is yours.

**Connie Elliott:** [00:48:28] Thanks, Frank. My lifetime [00:48:30] of research has been devoted to understanding how societies collapse into disorder and how they pull themselves back out again. This is a problem that has plagued humans in cycles all the way from Ur of the Chaldees forward through Rome through today. The survivability of a republic was very much on our founders minds, and for the past two generations time, [00:49:00] we have seen incredible challenges to the survivability of our Republic. And today, despite the fact that some of our earliest works, American works codifying the laws of our states say that there are some things that our governments and that we cannot divest ourselves of. Our Congress, excuse me, is about to attempt to divest us of our right to self-governance, to the [00:49:30] World Health Organization. These

attacks. Historically have been through the language, and a self-appointed self-anointed elite decides that they don't like how we understand a given set of rights, and so they seek, through public discourse to shift our understanding of what the very terms that are codified, that are the bedrock of our social [00:50:00] contract mean. What does it mean to have rights? Well, it used to mean that we were protected from our government imposing upon us. We were protected from having anybody imposed upon our freedom of conscience because we were each our, each unique creations of God and therefore inherently imbued with rights by him, just as a function of being human now, [00:50:30] right seemed to mean that we have the right to get things from government. The shift has occurred very gradually. These attacks are used, can be used, have been used to trigger us into a frenzy of killing our disliked neighbors.

**Connie Elliott:** [00:50:55] The language of health is about exciting disgust [00:51:00] in us, which is a form of feeling threat. In fact, the very first chain of laws and regulation that triggered the Holocaust was a public health announcement that Jews and members of the Aryan race could no longer use the same swimming pool. And that's how, over the course of eight or so years, the Germans went [00:51:30] from living side by side with their Jewish populations, Jews and Gypsies and other minorities, to shipping them off to the camps. The shift in tools has become accelerated. It's become a little scary. Nowadays, this right here is the primary means by which we're manipulated and through our social media apps. Not only. Not [00:52:00] only are the search engines like Google feeding us suggestions, which really are subliminal advertisements trying to set our biases about what it's acceptable to think around a term, or where our attention should be focused for a day. But the artificial intelligences that are running these social media applications are told to optimize for addictiveness. They're told to make certain that our eyeballs stay on the screen, that [00:52:30] we click from it, from a piece of information to a piece of information. And while this starts out as attracting our attention over time, as we're flooded with information, it can not only affect our addiction psychology, but our attachment psychology, who we perceive of as us and who we perceive of as other. Who's frightening, who's disgusting, who's scary. [00:53:00] And it is through the manipulation of these very basic emotions.

**Connie Elliott:** [00:53:04] You know, defining and other inciting disgust toward the other that slowly the other becomes deprived of their rights, first in manners and then eventually in law, and once the other is disarmed more than once, the chain of events

ends in killing. The way we're being driven to this [00:53:30] outcome today is through the lens of biopower power over life. And this was a term developed by the French philosopher Michel Foucault, whose career was described by a colleague as a long exploration of transgression. Always linked to knowledge and power. It was expanded on Foucault's work by an Italian, Giorgio Agamben, in his paper Biosecurity [00:54:00] and Politics. Scholars of Foucault and Agamben write on topics like viral geopolitics, biosecurity, and global health governance. That is to say that obviously we are not advancing the Marxist revolution fast enough. We are not ceding power to the elites fast enough. And so we have to be incited to do so through fear of our health. And that's [00:54:30] that's the manipulation happening now. They're going to very, very basic human urges disgust, fear, threat, anger. And they are trying to use it to convince us to give up our rights to somebody who supposedly can keep us safe and healthy. Only we're objecting to it. But now Congress appears to be locked in. Well, through [00:55:00] the complexity of the budget process appears to be ready to give up those powers. Will we or nil we. And so can we. Stop it? Can we fight this? Can we bring Congress back to its senses? This seems to be part of the question of our immediate moment. Thank you.

**Frank Gaffney:** [00:55:23] Indeed it is. Thank you so much. Connie Elliott, I'm reminded that one of the people who [00:55:30] has been appointed in the job of W.H.O. Nudger in chief, and I'm trying to come up with her. Her name, and I don't have it right at hand is, as I understand it, a communist who was instrumental in shaping the British government's strategy for compelling people to comply with Britain's various mandates and other requirements, again shaped very considerably [00:56:00] by the advice of Tedros Ghebreyesus. This is a chilling thought, especially as you say, Connie, with the various tools, subliminal and otherwise, that are able to be brought to bear now to induce behavior, if not actually compel it. And that will be of tracking that part of this story closely. In our final comments from Dede Laugesen, our executive director of [00:56:30] Save the Persecuted Christians, and she introduced herself earlier. I will simply say about her that she is one of the most profoundly, profoundly convicted human beings I've ever met. She has an appreciation for both freedom and faith, and her service to both is without parallel. And we're privileged to have her as a member of our team, and delighted to have her with us to talk, in conclusion, about the role that American Christians [00:57:00] must now play to preserve a future of hope and freedom

for, plus as well as our posterity dialogues. And thank you for putting this all together. And now the floor is yours.

**Dede Laugesen:** [00:57:16] Thank you, Frank, and thanks to all of our incredible panelists today who've had so much to give to us with regards to this conversation. I want to remind everybody what we went through during Covid when we [00:57:30] were told to stay home, stay away from everyone. Anyone could be a danger. We weren't allowed to travel. We were mandated to receive a new experimental gene therapy that they had to change the definition of vaccines in order to call it a vaccine. They changed the definition on the CDC website to what a vaccine is. And it and then we were told that the pandemic [00:58:00] was a pandemic of the unvaccinated because so many people were not willing to subject their bodies to this kind of experiment. And they were dehumanized. They were othered by our own administration, by the Biden administration, by the president himself, and made to be pariahs within the human community. They weren't doing their part, and they want to institutionalize these kinds of [00:58:30] experiences that we had under Covid, under the China model that Tedros Ghebreyesus advised the world to take up. And we saw many global elites, leaders of countries, Trudeau and Canada was saying that he was envious of the control that China has over its citizens, that they could lock people in and put, you know, put barriers to their apartment buildings and keep them well managed [00:59:00] during this public health crisis that we went through. And, you know, it was really totally dehumanizing and demoralizing for the entire world population to be put into a situation like that.

**Dede Laugesen:** [00:59:13] But not only that, churches were closed and deemed non-essential to the point that the CDC bought the phone records of millions of Americans so that they could track [00:59:30] and surveil and see if we were complying with that order to stay away from the churches. And we saw pastors in America and up in Canada and elsewhere who were vilified and even arrested because they were trying to keep this community place open for their constituents who needed this in this time. And the mental health crisis went through the roof. So the destruction to humanity [01:00:00] as a whole was not addressed during Covid, and really in these new reform documents that they're working on at the who they've struck needing to worry about human rights within, within the documents. So they took that language out of the documents. So we know that there's something at play here. And it really is all about power and control.

And we've heard from Lord Acton, a British historian, he once said, [01:00:30] power tends to corrupt. Absolute power corrupts absolutely. And it's an observation that a person's sense of morality seems to lessen as their power increases. The people who are leading these international organizations that have incredible influence on leaders of countries around the world and have people in positions of power within countries and in these international organizations. The [01:01:00] World Economic Forum with Klaus Schwab and Noah Yuval Harari Noah Yuval Harari is a top advisor to the World Economic Forum, and he's really the master crafter behind the scenes.

**Dede Laugesen:** [01:01:15] This man says about humanity, as far as we can tell, from a purely scientific viewpoint, human life has absolutely no meaning. Humans are the outcome of blind evolutionary processes that operate [01:01:30] without goal or purpose, and our actions are not part of some divine cosmic plan. And if the planet Earth were to blow up tomorrow, the universe would probably keep going about its business as usual. As far as we can tell at this point, human subjectivity would not be missed. Hence, any meaning that people inscribe to their lives is just a delusion. This is from his book sapiens A Brief History of Humankind. Noah Yuval Harari, this [01:02:00] top master planner for the World Economic Forum, which has tendrils, powerful tendrils. Into the international organizations like the Who, the world Bank, the CDC, nation states across the world. They are atheists at heart or occultists, and they are not holding to the Western biblical world view that really permeates [01:02:30] the US, our government, our foundation, and all of Western civilization. This is truly an attack on Western civilization, a war against God. But it is a clash of ideologies, this one health ideology that wants to equate humanity with bugs, animals, plants, and the environment is really a way to diminish humanity, to strip us of our dignity, [01:03:00] of our individual rights, and lump us into just a pot of stew of no real meaning, but that their God is the environment, and they are the top promoters of the climate hoax to force humanity into a place where they will weaponize health through these public health emergencies.

**Dede Laugesen:** [01:03:26] As Frank has explained, it doesn't just have to do with pandemics and [01:03:30] disease, it has to do with many other things that threaten human health and the health of the planet. This one health is also described as EcoHealth or planetary health, so they see that humans are not special in that environment, that humans are just one part of life, and that human life should not be more important than the health of the planet, or the bugs, or the or the animals. And so

what [01:04:00] you see, and that goes completely in opposition to the biblical worldview in which humans were made uniquely, as Reggie said in the image of God, and that we were set by him as stewards of the earth to steward over the earth and all that is in it. This is a complete spiritual warfare that is going on between atheists who despise God and human sense of, [01:04:30] of purpose. Because if they can strip humanity, of their sense of purpose, if they can say that we really are not important in all of that, then we can be just, just become little worker bees that have no real gift to give to the world.

**Dede Laugesen:** [01:04:46] But in reality, this is a Malthusian theory that the population growth is potentially exponential, while the growth of food supply and other resources is linear, and that eventually reduces living standards to the [01:05:00] point of triggering a population decline. But the reality is, is that humans are the world's greatest resource. We are the ones who take what the world has and turn it into value, into worth. So it's a completely opposite opinion here. And these things are clashing together right now. And I just really wanted to host this webinar today so that Christians and others who, you know, have this perspective that [01:05:30] humans can steward the planet and steward the planet well, and that population is not a bad thing, but every human soul is a gift to the world. That is not how they see it. And the elites, they do not like us. We had a webinar yesterday. Frank talked about it at the top of the hour. And this webinar, Fallen to Tyranny that's available at [StopVaxPassports.org](http://StopVaxPassports.org) stop vax passports. Org we heard from Honorable [01:06:00] Michele Bachmann, a former congresswoman who really told us the elites, they hate us. They do not like the unwashed populations of the world. And Yuval Noah Harari says that his eye develops and is able to take over the positions of, of the population of the world. We will have nothing to do with ourselves. We will become useless eaters.

**Dede Laugesen:** [01:06:24] We will become literally a cancer upon the earth. And so, as I see it, if you play this out, [01:06:30] this dictatorship through the who, the weaponization of health, the expanding vast largesse of the universe, of what they can control, they will eventually get to a point where humans are isolated from the rest of the planet that we are pulled into controlled 15 minute - whatever they want to call it - cities where our travel is severely restricted. That population will be slowly forced to [01:07:00] decline through supply chain emergencies and other things. That and even eventually that they make. Come to say that it is beholden upon the nations of the earth, that they must call their populations in order to save the planet. And that's really what I'm

concerned about. My children, my grandchildren, their children to get to come, are seen as animals that can just simply be killed off to bring about that equity [01:07:30] that they want to achieve. And this is a very dangerous time for the world, for people of faith, for because we will be the dissenters, we will be the ones and are already being the ones who are paying the price. Just this week, an 85 year old woman went to the YMCA. She was in the locker room. She saw a man dressed in a woman's swimsuit with his stuff hanging out. While he's watching little girls get dressed. She told him [01:08:00] he needs to leave.

**Dede Laugesen:** [01:08:01] She went to management and management, banned her from the YMCA. And that is what is coming our way. That is the kind of control. It's absolute madness. But that is what they're driving. Madness division upset, shaking the world, really destroying everything we've ever known or understood so that they can centralize that control and weaponize health against us. Oh, and I just wanted to [01:08:30] really encourage everybody. We were born for a time like this. God knew when he created us in our mother's womb, he knew us, and he knew that we were made for a time such as this. And we have been forewarned in the book of revelations that you will not be able to buy and sell. You will not be able to travel without their permission. We knew this time was coming without that mark, that QR code, that digital ID that you have that allows you to go in and shop. These are the controls that are coming our way. But we were made for a time such [01:09:00] as this, and we encourage all of you to go to the [SovereigntyCoalition.org](https://www.SovereigntyCoalition.org), where there are a huge group of people are working very hard to retain our freedoms, our liberties and our nation's sovereignty. Sign on to the American Sovereignty declaration and take the actions and follow what's happening. There is a huge movement to counter this and we need everyone on board. Thanks, Frank.

**Frank Gaffney:** [01:09:25] Dede, thank you for your extraordinarily impressive contribution, but also [01:09:30] to, you know, your vision for putting this particular program together with these extraordinary panelists. We are at the end of the time we asked you to a lot to us. We could very usefully get into questions, but I think in respect for your time and also trying to make sure that this product is as accessible and usable as we can, I think we'll cut it off here. I just would like a closing thought this if it goes down. Will be the greatest voluntary [01:10:00] devolution. Surrender. Abdication of power, of self-governance of freedoms in mankind's history. I had a fascinating

conversation this morning for a television program we do Securing America on the Real America's Voice Network with a woman by the name of Jeff Van Fleet. A survivor of one cultural revolution [01:10:30] in communist China. She's now what I call a foreign born American patriot. She lives in the United States. She is devoted to trying to protect our freedoms. In fact, I think it's one of the wonderful attributes of such individuals they understand better than we do. How perishable freedom is and how once lost. How really difficult it is to recover it. The same with sovereignty. And she spoke to these points with great clarity, and I commend that interview to you all. But I [01:11:00] just wanted to leave you with this particular thought. The people who are driving this. Seek to do us harm. They couldn't be more explicit about it. It is about global governance, not our representational representative, I should say, limited government of checks and balances and accountability. The framers of this Constitution must be spinning at [01:11:30] a very high RPM in their graves, at the prospect that we will, without any resistance at all, without even really knowing about it, relinquish what they bequeathed to us, and fully expected that we would strive to bequeath to our children.

**Frank Gaffney:** [01:11:47] And, as Dede said, our children's children. This is the moment of truth. I agree with Dede Logan. This is a time such as this that we were [01:12:00] made for. It is to us to determine whether this will go as the Biden administration and the Chinese Communist Party and all the others have in mind, or whether we will resist. What they are trying to do, whether we will move politicians in the Congress of the United States, in the States, in, you know, levels of government throughout our country, in the media, in the [01:12:30] various communities and organizations and faith leadership especially to resist what is being done here, to, first of all, understand what is being done here and help everyone else do that, and then lead the fight to ensure that it does not take place on our watch. We commend you again, the SovereigntyCoalition.org platform. It will enable you with a [01:13:00] click of a mouse to let those who represent you. To know that your view, your attitude, your insistence, your demand is that they preserve our Constitution. As I said earlier. They swore an oath to do. We need you to do that now. We thank you for your time today. We thank each of these extraordinary thought leaders for coming together to make [01:13:30] clear how great the stakes are. Join us at SovereigntyCoalition.org. And it will make all the difference. Thank you. God bless you. Dede, back to you.

**Dede Laugesen:** [01:13:42] A video of this webinar will post to [SaveThePersecutedChristians.org](http://SaveThePersecutedChristians.org) within a day or two of the end of the program. Please share this with your colleagues and other networks. Please tell at least three friends. We invite you to join with us every month on the third [01:14:00] Thursday for more educational programs by Save the Persecuted Christians, and help support this and other programs of Save the Persecuted Christians, a US registered educational nonprofit. Prayerfully consider making a monthly contribution to the work of our coalition and partner organizations. Thanks again for being here today and goodbye.
